CG AUXDATA

AUXDATA…Newsletter #3

Welcome   Welcome to our third issue of the CG AUXDATA Newsletter dedicated
to providing you with periodic updates on the new systems
development cycle and links for all of you to view the "work in
progress."

NEW TERMS AND DEFINITIONS

EMPLID- Employee Identification Number

CGHRMS- Coast Guard Human Resource management   system. GHRMS provides the Coast Guard with a centralized database containing personnel, training and related accounting data**.**

> ➢ This newsletter will introduce the EMPLID and explain the origin and rationale behind its implementation. No date has been determined as yet for the dissemination of these numbers, however, this office is working diligently to make sure they are available to the entire Auxiliary force in the latter part of 2001.

> ➢ To better access members electronic and personnel records all Team Coast Guard members are been assigned EMPLIDs. The Active Duty and Reserve forces were the first to be issued these numbers. In the spirit of Team Coast Guard and to better align the Coast Guard Auxiliary with the Active Duty force, all Auxiliarist will be issued EMPLIDs.

> ➢ The EMPLID is a CGHRMS generated number that identifies each Coast Guard member. The EMPLID will be a replacement for the member number and will serve as the primary method of accessing member's electronic travel claims, patrol order claims and personnel records in the new Coast Guard Human Resource Management System (CGHRMS).

> ➢ The EMPLID will also replace the member number in the new Auxiliary database, AUXDATA; consequently Each Auxiliarist will receive an EMPLID prior to the introduction of AUXDATA. EMPLID will reduce the need to display and use the Privacy Act sensitive SSN. The EMPLID will not replace the Social Security Number but will minimize its use on electronic data panels.

> ➢ There area few issues regarding the EMPLID starting with an understandable concern about the elimination of the current member numbering system. We are working on the best all around solution, more to follow.

When can I start reviewing AUXDATA	Expect Internet capability in August 2001. In the interim you may access the new AUXDATA system by going to a location where the Coast Guard has a SWIII computer terminal and logging on using the following INTRANET URL and password:

The URL provided in our last issue of AUXDATA has been changed to http://auxdatadev.osc.uscg.mil
The user-name and password remains the same.
User-name: auxtest
Password: test_aux

Comments maybe directed to ENS Williams at e-mail below: DFWilliams@comdt.uscg.mil |
| **AUXDATA Training at NACON 2001** | Plan to attend one of our AUXDATA training sessions At NACON 2001. Training will be held on Aug 31 at 1330-1515 and on September 1 at 1315-1500. The training sessions will take the form of lectures, workshops and product demonstration. Technical Representatives from the Coast Guard's Operational System Command, Auxiliary and the Chief Directors office will be on hand to answer any questions participants may have. This is your opportunity to come see our new system at work and get the opportunity to be trained on using AUXDATA. |
